

B2000S-4D Turntable system

High-frequency welding

Efficiency in a circle
Performance in rhythm

- Thanks to separately adjustable welding parameters, several items can be welded simultaneously
- Expansion of the turntable system with scanners, printers or robots
- Continuous production with high quantities
- Hydraulic lifting table press with robust round column guide, centric HF feed and CE-compliant shielding
- Version also available electric or as 6-way, 8-way turntable

**Your solution for high-frequency
welding
-Made in Germany-**

Plate size:	800 x 700 mm
Press force:	20/40 kN
Stroke:	150 mm
Main supply:	400 V – 50 Hz
Pneumatic supply:	6 bar
