

# B2000-2SM

Sliding table welding machine

High-Frequency- welding

## Two Products One Process

- Two different items can be produced simultaneously with separately adjustable welding parameters
- Individually configurable thanks to modular system - from manual to fully automatic
- Reliable & reproducible welding results
- Hydraulic lifting table press with robust round column guide, centric HF feed and CE-compliant shielding

**Your solution for high-frequency  
welding  
-Made in Germany-**

|                   |               |
|-------------------|---------------|
| Plate size:       | 750 x 550 mm  |
| Press force:      | 20 kN         |
| Stroke:           | 150 mm        |
| Main supply:      | 400 V – 50 Hz |
| Pneumatic supply: | 6 bar         |
